Video Capture

The interface displays a live video feed of a worm in a petri dish. The settings panel on the right includes the following information:

- Camera:** Basler - acA2440-35um
- Time:** 00:09:05.629
- Frame:** 7639
- Rate:** 14.000
- Buffer:** (no value specified)

Buttons: Display grid, Display clipping

Capture Settings:

- Folder:** Tracker/TDP-43 Worm Test
- File prefix:** 20210503_CK1441;CK194
- Buffer:** 128 frames
- Duration:** 0 : 1 : 0 (checked)
- Time-lapse:** 1.00 seconds (unchecked)
- Open video after recording:** (checked)
- Show Stimulus Controls:** (unchecked)

Recording Controls: Record, Stop, Snapshot

Callouts:

- Live View – not recording (points to the 'Live view' text)
- File location (points to the Folder field)
- File name (points to the File prefix field)
- Duration (set to 1 min) (points to the Duration field)
- Recording Controls (points to the Record, Stop, and Snapshot buttons)
