

- NABA CORE MATRISOME
- Neutrophil degranulation
- Complement and coagulation cascades
- Hemostasis
- Lysosome
- Regulation of Insulin-like Growth Factor (IGF) transpo
- cell-substrate adhesion
- extracellular matrix organization
- Phagosome
- Degradation of the extracellular matrix
- wound healing
- NABA ECM REGULATORS
- protein maturation
- Cell surface interactions at the vascular wall
- Vesicle-mediated transport
- Protein processing in endoplasmic reticulum
- PID INTEGRIN3 PATHWAY
- blood vessel morphogenesis
- positive regulation of locomotion
