## **Materials**

| Name   | Company  | Catalog Number                               | Comments                     |
|--|--|--|------------------------------|
| One conventional tDCS device (Soterix 1x1 Low-intensity DC Stimulator) | Soterix Medical Inc., New York, NY, USA        | 1300A  |                              |
| One 4x1 Multichannel Stimulation Adapter                               | Soterix Medical Inc., New York, NY, USA        | 4X1-C2                                       |                              |
| Four 9V batteries  |  |  | Many manufacturers available |
| One modular electr–ncephalogram recording cap                          | EASYCAP GmbH, Germany                          | EASYCAP                                      |                              |
| Five Ag/AgCl sintered ring electrodes                                  | Stens Biofeedback Inc., San<br>Rafael, CA, USA | EL-TP-RNG Sintered                           |                              |
| Five specially-designed plastic casings and their respective caps      | Soterix Medical Inc., New York, NY, USA        |  |                              |
| One plastic plunger  | Soterix Medical Inc., New York, NY, USA        | PSYR-5                                       |                              |
| Cables   | Soterix Medical Inc., New York, NY, USA        | CSIN-X2 Input Cable, CSOP-D5<br>Output Cable |                              |
| One measuring tape   |  |  | Many manufacturers available |
| One wooden cotton swab   |  |  | Many manufacturers available |
| Electrically conductive gel (Sigma Gel)                                | Parker Laboratories, New Jersey, NJ, USA       | 15-25  |                              |
| One 3- or 5-ml syringe   |  |  | Many manufacturers available |
| Adhesive tape  |  |  | Many manufacturers available |
| Paper towels   |  |  | Many manufacturers available |
