EMBED JOVE VIDEOS IN YOUR ONLINE COURSES
JoVE videos can easily be embedded, either individually, or in bulk, in most LMSs (learning management systems). Here are a variety of helpful how-to documents to walk you through setup in your system.

CREATE AN INDIVIDUAL JOVE ACCOUNT
Students and faculty can create an account with an institutional email to access JoVE videos off-campus. Watch a short how-to videos.

SIGN-ON USING SHIBBOLETH OR OPENATHENS
Students and faculty can use Shibboleth or OpenAthens to login to JoVE. Select your university from the drop-down menu and this will prompt you to sign in with your institutional email and password. If you require access, please get in touch with JoVE at customersuccess@jove.com.

AUTHENTICATED REMOTE ACCESS WITH EZPROXY
As with any electronic resource, authenticated remote access to JoVE content can be provided by EZproxy.

Any of these options will allow complete access to the institutional subscription provided by your library. Having any issues? Reach out to JoVE’s Curriculum Specialists at customersuccess@jove.com.
